TO: Junior/Community College Architecture/Construction/Engineering Departments for Undergraduate Students FROM: Jennifer Tolman, Office Assistant, Concrete Masonry Association of California and Nevada (CMACN)

RE: Year-round, \$250 - \$500 <u>ARCHITECTURE/CONSTRUCTION/ENGINEERING SCHOLARSHIP</u>

for the study of concrete block masonry

Dear Professors, Staff, and Students:

Concrete Masonry Association of California and Nevada, a non-profit organization, is pleased to announce we will continue our scholarship program in 2026, open year-round, to include undergraduate level architecture, construction, and engineering students who study concrete block masonry as a construction building material at a two-year college in California or Nevada.

As an association of concrete block manufacturers, CMACN's mission is to strengthen the masonry industry in California and Nevada by providing technical information resources on concrete block masonry for design professionals, protect and advance the interests of the concrete block masonry industry, develop new and existing markets for concrete block masonry products, and coordinate our members' efforts in solving common problems within the masonry industry. CMACN develops, monitors, and coordinates test programs, research projects, and specification updates. We publish technical and educational data, and both receive and disseminate recommendations for improved product use. To this end, we have established a scholarship program to promote the study of concrete block masonry as a subject in California and Nevada.

Each Architecture/Construction/Engineering Scholarship recipient will receive \$250 - \$500 along with a copy of the *TMS Masonry Designers' Guide* and CMACN's *California Nevada Supplement to TMS Masonry Designer's Guide*. All scholarship recipients must return to California or Nevada colleges the following semester as architecture, construction, or engineering students. **There is no predetermined number of scholarship awardees; selections are determined by application question responses.** For more information about CMACN scholarships, visit www.cmacn.org. For more information about concrete block masonry, visit www.whymasonry.org

REQUIREMENTS: Scholarship requests should be submitted via email or mail on the <u>attached application</u> along with <u>answers to the questions located at the bottom</u>. For your application to be complete, <u>a departmental recommender must also email or mail</u> a dated and signed <u>letter of recommendation</u> on your behalf. (<u>Letters of recommendation will only be accepted from the recommender</u>, NOT the applicant.) <u>To be considered for a specific scholarship, your completed application, question</u> answers, and letter of recommendation must be emailed or postmarked no later than the closure dates listed below:

ScholarshipApplication Closure DateSpring ScholarshipMonday, March 9, 2026Summer ScholarshipMonday, June 1, 2026Fall ScholarshipTuesday, September 1, 2026Winter ScholarshipMonday, December 7, 2026

Individuals may only receive ONE CMACN Scholarship award per calendar year (January – December). Repeat applicants and previous awardees are welcome to apply. All scholarship applicants will be notified of award status approximately two months after the scholarship application closure date. <u>Applications suspected of ANY AI use</u>, including but not limited to Grammarly, or utilizing answers previously submitted will be disqualified.

Please call or email if you have questions regarding this matter.
